Good Morning Jane,

Thanks for your question about who the right contact is for Essential Fish Habitat (EFH) in the Gulf of Mexico (regarding an Outer Continental Shelf [OCS] 5-year permit renewal for discharges from offshore oil and gas facilities).

The EFH contact for the Gulf, Rusty Swafford, copied here, can be reached at [\(409\) 766-3699](tel:4097663699).

We are moving the lead role on EPA ESA section 7 consultations for the Southeast Regional Office to the National Marine Fisheries Service HQ in Silver Spring, Maryland (per a very recent management decision). I just confirmed with Allison Hernandez, copied here (phone [301-427-8413](tel:3014278413)), that she is your best contact for section 7 consultation related to this OCS permit renewal.

All the best to you in your next adventure! It has been a pleasure working with you!

Sincerely,
Sarah

Hello Sarah and Rachel,

I wondered if you could steer EPA Region 6 to the right contact in NMFS/NOAA to help us address the EFH Assessment as we renew a permit for discharges from offshore oil and gas facilities, referred to as the OCS permit (Outer Continental Shelf), for another 5 year term.

Attached please see the EFH response from NOAA on BOEM's EIS for this activity. EPA's plan is to use BOEM's analysis as a foundation, and add a supplement to specifically focus on the activities authorized by the permit.

Who would review our submission? Would be the authorized signature be the same as the BOEM EFH? We very much need to coordinate closely with right NOAA/NMFS staff to get the right direction and hopefully reduce your review time.

This is a general permit that provides coverage to many facilities, new applicants can't be covered once the existing permit expires, so the expectation to renew expeditiously is high, from industry standpoint.

Any help would be greatly appreciated. Brent Larsen is our POC, he can be reached at [214-665-7523](tel:214-665-7523), Larsen.brent@epa.gov.

Certainly, I'm happy to talk to you about any good advice/contacts you have, I'm at [214-665-6653](tel:214-665-6653). The caveat is that Thursday (08/31) is my last day at EPA, going off into retirement!

Thanks
Jane
